

Do the things we love always stay the same?

Toy story

We are going to learn about toys through history. We will be exploring what materials have been used throughout history to make toys and how this has change over time. These tasks are designed to help extend our learning at home. Pick as many as you like and bring your homework into school throughout the half-term. Please note that display space is limited - we share and value all homework but don't always have room to display everything.

Design a poster for a new toy you've created, make it eye catching!	Interview your grandparents about the toys they had, draw a picture of one of the toys.	Use junk modelling to make your own toy.
Create a poster about the toys your parents had.	What do your toys do when you're at school? Write a diary entry explaining what they do.	When was the first battery toy invented? Create an information leaflet about this.
Set up your own pretend toy shop. How many different toys can you sell?	Write a poem about your favourite toy.	What materials are your toys made from? Can you sort them into groups?
Make your own air powered car.	Create your own teddy bear art.	Explore toys from around the world, how are do they compare?
