- city
- continent
- county
- country
- crops
- distribution
- demand
- Equator
- land use
- local
- Fairtrade
- farming
- global
- Northern Hemisphere
- produce
- profit
- seasonality
- Southern Hemisphere

- supply
- trade

Fair Trade is a process used by organizations around the world to make sure that they buy and sell farmed goods. The aim is to give the farmer a fair price for their work and materials. It focuses on developing countries, where workers are paid less. The goal of the fair trade movement is to ensure that all produce from farming is paid for fairly.
