

YEAR 6

Week 18 - Thursday

Reading Line Graphs

A line graph to show the temperature outside on the first day of the month.

- 1.) Estimate the difference in temperature outside between March and July.
- 2.) Calculate the temperature in October if it was twice as warm as it was in February.

Back to Basics

3.) $\frac{8352}{19} =$

4.) $837 \times 87 =$

5.) $4,339 + 6,549 =$

6.) $9,003 - 3,298 =$

ANSWERS

Reading Line Graphs

1.) 12°C to 14°C

2.) 6°C

Back to Basics

3.) $439 \frac{11}{19}$

4.) 72,819

5.) 10,888

6.) 5,705
